SECTION C - DESCRIPTION/SPECIFICATIONS/WORK STATEMENT

The following information provides clarification to certain discrepancies of the TDP for the M142 Firing Device and is hereby incorporated into Section C of original Request for Proposal W52P1J-06-R-0199:

a. MIL-F-63090. In paragraph 4.4.2.1 (page 7) of MIL-F-63090, the drawing number for the Grommet should be 9335567 (Attachment 16), NOT 9296879.

b. In Section C of the RFP, it states that Specification TT-C-2114 on Drawings 9296867 (Attachment 17) and 9296878 (Attachment 18) have been cancelled without replacement, but that alternate materials are acceptable. Because TT-C-2114 has been cancelled without replacement, the original materials of the Cable Reel and Trip Wire cannot be used. Only the alternate materials listed on the drawings are the ones that can be used. In addition, any references to FED-STD-595 pertain to color (olive drab) and do not refer to the type of protective coating.

c. In Drawing Number 9296878 (Attachment 18), Note 4 lists an alternate material for the Reel, Cable. The alternate material (polystyrene) does not require the TT-C-2114 protective finish.

d. In Drawing Number 9296867 (Attachment 17), Note 5 lists an alternate material for the Wire. The Wire that is made from the alternate material, Drawing Number 7548177 (Attachment 19), requires the protective coating MIL-STD-171 finish number 20.1 OR 20.2. Note 3 on Drawing Number 9296867 (Attachment 17) would apply; however, the MIL-STD-171 finish called out in 7548177 (Attachment 19) would be used to secure the wire in lieu of the TT-C-2114 finish.
